## Revision History

Name	Date	Reason For Changes	Version

# 1. Introduction

## 1.1 Purpose

This SRS defines the functional and nonfunctional requirements for the **Dynamic Wedding Planning Platform**. The platform is designed to simplify and streamline the wedding planning process by integrating vendor services, budget tracking, and real-time updates into one cohesive system.

## 1.2 Document Convention

- **REQ-[Number]:** Each requirement is uniquely identified.
- High, Medium, and Low priority levels are assigned to requirements.
- Placeholder terms or incomplete information is marked as **TBD** (To Be Determined).

## 1.3 Intended Audience and Reading Suggestions

This document is intended for:

- **Developers:** For implementation of system features and integrations.
- **Testers:** For verifying functional and nonfunctional requirements.
- **Vendors and Couples:** To understand the system's functionality.

## 1.4 Product Scope

The **Dynamic Wedding Planning Platform** provides an all-in-one solution for couples to plan their weddings. The platform integrates dynamic vendor bookings, guest list management, real-time budget tracking, and personalized wedding timelines. It supports vendors in showcasing services and couples in planning their weddings seamlessly.

## 1.5 References

- IEEE Software Requirements Specification Template
- Payment API Documentation (Stripe, PayPal)
- Google Maps and Calendar API Documentation

## ***2. Overall Description***

### ***2.1 Product Perspective***

The platform is a standalone product integrating APIs for payments, calendar synchronization, and maps.

### ***2.2 User Classes and Characteristics***

#### **Couples:**

- Primary users.
- Require intuitive interfaces and features for planning.

#### **Vendors:**

- Service providers listing offerings.
- Require straightforward profile management and booking tools.

### ***2.3 Product Functions***

Key features include:

- Vendor Marketplace with search, filters and booking.
- Availability tracking for vendor services.
- Budget management with expense tracking and alerts.

### ***2.4 Operating Environment***

- **Platforms:** Web browsers (Chrome, Firefox, Safari, Edge).
- **Devices:** Desktop, tablets, and mobile phones.
- **OS Support:** Windows, macOS, Android, iOS.

### ***2.5 Design and Implementation Constraints***

- Use of industry-standard APIs for payments and location services.

## ***2.6 User Documentation***

- Video tutorials for couples and vendors.
- Detailed user manuals (PDF and online)

## ***2.7 Assumptions and Dependencies***

- Vendors maintain accurate availability and service details.
- Reliable APIs for payments, maps, and calendars.

### ***3. External Interface Requirements***

#### ***3.1 User Interfaces***

- Vendor dashboard for profile and availability updates.
- Couple dashboard for planning tools, budget tracking, and vendor management.

#### ***3.2 Hardware Interfaces***

No specific hardware requirements beyond standard internet-enabled devices.

#### ***3.3 Software Interfaces***

- Payment APIs: Stripe, PayPal.
- Calendar APIs: Google Calendar, iCal.
- Maps API: Google Maps for venue locations.

#### ***3.4 Communications Interfaces***

- HTTPS for secure communication.

## 4. System Features

Main system features provided by the WedNest are:

- **Vendor Marketplace** :Allows vendors to list services and couples to book them.
- **Availability and Bookings**: Tracks vendor availability dynamically.
- **Budget Tracking** :Tracks and adjusts wedding budgets .

Step	Couples (Users)	Vendors
<b>1. Registration and Onboarding</b>	- Sign up with details (name, email, wedding date, budget).	- Register with business details (name, category, location, pricing).
	- Set preferences (wedding style, theme, budget).	- Create a profile with photos, videos, testimonials, and services.
	- Access tools like budget tracker and vendor search.	- Set availability with an integrated calendar.
<b>2. Service Search and Listing</b>	- Browse vendors by category (venues, photographers, florists).	- List services with detailed profiles, photos, pricing, and reviews.
	- Filter results by budget, location, and reviews.	- Appear in search results when couples browse or filter by criteria.
	- View vendor profiles with availability and pricing.	- Display availability .
<b>3. Booking Management</b>	- Check vendor availability and book directly through the platform.	- Receive booking inquiries and accept or decline requests.

	<ul style="list-style-type: none"><li>- Receive instant booking confirmations and updates.</li></ul>	<ul style="list-style-type: none"><li>- Update availability dynamically after bookings to avoid double bookings.</li></ul>
<b>4. Budget Management</b>	<ul style="list-style-type: none"><li>- Set a wedding budget and allocate amounts for categories like catering and venue.</li></ul>	<ul style="list-style-type: none"><li>- View payment schedules for each booking.</li></ul>
	<ul style="list-style-type: none"><li>- Track expenses in real-time and receive alerts for budget overruns.</li></ul>	<ul style="list-style-type: none"><li>- Track earnings and manage invoices through their dashboard.</li></ul>
<b>5. Post-Event Features</b>	<ul style="list-style-type: none"><li>- Share wedding experiences through reviews.</li></ul>	<ul style="list-style-type: none"><li>- Receive recommendations and ratings to improve services.</li></ul>

## **5. Other Nonfunctional Requirements**

### ***5.1 Performance Requirements***

- Support for 5,000 concurrent users.
- Response times under 3 seconds for searches and updates.

### ***5.2 Safety Requirements***

- Secure data storage and backups to prevent data loss.

### ***5.3 Security Requirements***

- Single-factor authentication for vendors and couples.

### ***5.4 Software Quality Attributes***

- **Usability:** Simple UI for non-technical users.
- **Availability:** 99.9% uptime guarantee.
- **Scalability:** Auto-scaling for high-traffic events

### ***5.5 Business Rules***

#### **Vendor Rules:**

- Vendors must accurately update their availability.
- Vendors must agree to the platform's commission structure for every confirmed booking

#### **Payment and Booking Rules:**

- Vendors must provide full service details and pricing before bookings are finalized.
- All payments processed via the platform are subject to a 5% commission fee (or flat fee as applicable).
- Refund policies must adhere to platform-specific guidelines, ensuring clarity for both couples and vendors.

**User Rules (Couples):**

- Users must set their wedding date upon signup.
- Budget must be defined by users initially.

**Data and Privacy Rules:**

- User data cannot be shared with third-party vendors without explicit consent.
- The platform reserves the right to anonymize and aggregate data for analytics purposes but must comply with GDPR guidelines.
